

The medieval village of Castello di Albola, on the gorgeous hills of Radda in Chianti, has played a leading role in the Chianti Classico area for centuries; since 1500 it has been the home of noble Florentine families, first the Acciaiuoli, then the Pazzi and the Ginori Conti. The link between this area and wine is so strong that in 1841 the geographer and naturalist Emanuele Repetti wrote in the 'Dizionario fisico geografico del Granducato di Toscana': "Properly called Albola, a land accredited for its vineyards, from which perhaps the best Chianti wines are obtained."

Even today, the diverse composition of the soils, the fortunate exposures and the elevated altitudes create the conditions for wine production focused on excellence and in seamless harmony with the historic buildings, landscapes, art and culture of this marvellous corner of Chianti Classico.

CHIANTI CLASSICO DOCG 2025 ORGANIC

APPELLATION
Chianti Classico
DOCG

PRODUCTION AREA
Radda in Chianti

GRAPES
Sangiovese 100%

PLANT DENSITY
5.000 vines/ha

VINE TRAINING
Spurred Cordon
and Guyot

**YIELD PER
HECTAR**
60 q/ha

HARVEST TIMING
End September -
early October

HARVEST TYPE
Manual -
Mechanical

**TOTAL
PRODUCTION**
450.000

**ALCOHOL
CONTENT**
14 % vol.

**SERVING
TEMPERATURE**
16-18 °C

**AVAILABLE
FORMATS**
75 cl - 150 cl
- 300 cl

FIRST VINTAGE
1979

AGEING POTENTIAL
6-8 years

CASTELLO DI ALBOLA

Via Pian d'Albola, 31 - 53017 Radda in Chianti (Siena) - Tel. 0577 738019 - info@albola.it - www.albola.it

VINTAGE 2025

The 2025 vintage at Castello di Albola began with a late budbreak, a condition that helped avoid the critical effects of April rainfall, which in other areas encouraged the spread of vine diseases. Rainfall in May required careful phytosanitary management, without significant impact. June was marked by intermittent showers that supported balanced vegetative and productive growth. In August, the return of warmer temperatures caused mild water stress in some shallower parcels, later eased by rainfall in the third week of the month. The subsequent drop in temperatures at the end of August accompanied an even ripening of the grapes, also promoting good accumulation of colour compounds.

WINEMAKING AND AGEING

Upon receipt of the grapes, they are fermented in stainless steel tanks at a controlled temperature. The period in contact with the skins varies from 2 to 4 weeks with constant control of the extraction. Subsequently, the wines undergo malolactic fermentation in steel followed by a period of about 12 months in Slavonian oak barrels. Finishes ageing in the bottle.

TASTING NOTES

Colour: intense and lively ruby red
Bouquet: notes of fresh red fruit and Mammola violet stand out
Taste: harmonic and fresh, with well-integrated tannins, easy to drink

FOOD PAIRINGS

Perfect pairing for entry courses of the Italian traditional cuisine, roasted white meats and medium aged cheeses.

Castello di Albola follows the principles of sustainable development. The estate's Sustainability Report, prepared in accordance with the EQUALITAS standard, outlines its activities, achievements, and future sustainability plans.

Castello di Albola has joined LIFE VitiCaSe, a unique project in Europe and a global pioneer in Carbon Farming for viticulture. This initiative focuses on a series of agricultural and soil management practices aimed at enhancing the vineyard ecosystem's ability to capture and retain atmospheric carbon.

Since June 2021, the estate has successfully completed its transition to organic farming across all production activities and obtained the corresponding certification for its products.
